## Profile

I am an Agile consultant. I augment struggling teams and help them to adopt processes that allow them to become highly efficient. By focusing on the inter-personal relationships, I believe that a team's efficiency and productivity can be greatly improved.

## Experience

### **Agile Consultant, Integrum Technologies, January 2011 - Present**

I have been working on-site at clients' offices to help them adopt Agile. Parts of my responsibilities include augmenting the existing team to help them to meet project deadlines and to share technical knowledge. I am also responsible for helping to coach both developers and management staff in the reasons behind our values so that they gain the knowledge and experience to start making decisions that progress their team towards excellence.

### **Rails and Mobile Application Developer, Integrum Technologies, January 2010 - December 2010**

As a rails and mobile application developer, I was responsible for taking a product owners vision and materializing it into a tangible application. By working directly with clients and staying in constant communication, I was able to help them discover how software can address their needs and the needs of their users. I worked with clients ranging from start-ups to enterprise level corporations.

### **President of Women in Computer Science, Arizona State University, May 2009 - May 2010**

As the president for the Women in Computer Science student organization, I was responsible for organizing bi-monthly meetings, monthly community outreach efforts and coordinating the annual WCS programming competition. In order to accomplish the goals of our mission statement, I had to work closely with both peers and ASU faculty and create opportunities for the members of the organization to help promote a greater female presence in the industry.

## Qualifications

- Certified Scrum Master (CSM) 2011
- BS in Computer Science with a concentration in Software Engineering  
Arizona State University 2010
- Eagle Scout 2006
